

FOCUS ON GEORGIA – 2021

In 2014, the San Sebastian Film Festival started the activity **Focus on**, in collaboration with Telefilm Canada. A delegation of 12 Canadian producers was invited to participate in the Festival. In 2015, to consolidate this initiative and taking account of the country's production capacity, Canada once again occupied the centre stage of **Focus on**, this time also including professionals from the field of distribution. In the following **Focus on Nordics** a delegation of producers from Denmark, Iceland and Norway attended San Sebastian to make professional contacts and participate in the [Europe-Latin America Co-Production Forum](#) followed by a Focus dedicated to the Baltic Countries, inviting to the Festival professionals from Estonia, Latvia and Lithuania. In 2019, we welcomed professionals from Poland. In order to continue welcoming new professionals to the Festival, we would like to dedicate our next **Focus on** to Georgia in the framework of the X Europe-Latin America Co-Production Forum to take place in 2021. A delegation of producers and/or distributors from Georgia (up to 10) would come to San Sebastian to discover the Festival first hand and participate in the industry activities.

Should the Forum be finally only online this year, we will be glad to offer ten complimentary accreditations to the selected producers to participate virtually but the actual Focus on Georgia would be postponed to a further edition. Some of the activities such as drinks or presentations may also vary or be cancelled depending on the health standards established for September 2021.
